## WHO WE ARE

DARIC Investment Holding Company was established in 2001 for the purpose of taking part in industrial promotion of the country, creation of employment opportunities and training of creative skilled manpower in 2001. It was created based on completely private investment and started constructing and operating several industrial complexes.

This holding company achieved to create the proper infrastructures to make huge investments taking use of modern planning systems, updated knowledge and technology within a short period.

All these activities have been made with a focus on the promotion of local industry, development and welfare having in mind the ambitious aim of having a great share in regional and global markets. Currently this holding is the largest investment company in the northwest of the country.

This group has had a quick trend of development and it has been able to take benefit of every opportunity to promote its operating capacity, to create its subsidiaries in industrial, service and constructional areas to operate under the three holdings:

- GOSTARESH FOULAD TABRIZ investment Company
- FOULAD GOSTAR KOWSAR Investment Company
- ATA Airlines Investment company

Moreover, this company has created over thousands employment opportunities, relying on capabilities of its expert staff members and this fact plays an important role in the region employment.

## DARIC BRAND

The DARIC was a gold coin used within the Persian Empire. Cyrus the Great (550–530 BC) introduced coins to the Persian Empire after 546 BC. Darius I (521–486 BC.) introduced a thick gold coin which he named after himself, the daric, which had a standard weight of 8.4 grams. The gold used in the coins was of very high quality with a purity of 95.83% and it bore the image of the Persian king or a great warrior armed with a bow and arrow. Their use ended with Alexander the Great's invasion in 330 BC. Upon the invasion of Persia by Alexander they were melted down and recoinced as coins of Alexander. This is believed to be the main reason for their rarity in spite of their widespread usage at the time.

Close to the end of the 5th century BC, the Persian satraps in Asia Minor decided to strike their own coins. Darius considered such encroachment a crime punishable by death since the right of coinage was treated as an exclusively royal prerogative. The numismatic evidence does not permit identification of the image on the darics and sigloi as anything but that of the king; it was adopted by Darius as a dynamic expression of his royal power expressly for his coin issues. The coin is mentioned twice in the Old Testament which calls it the "adarkonim", as the Israelites came into contact with it when their Babylonian conquerors were conquered by Persia. The first Book of Chronicles describes king David as asking an assembly of people to donate for the construction of the Temple. The people gave generously "for the service of the house of God five thousand talents and ten thousand darics of gold, ten thousand talents of silver, eighteen thousand talents of bronze, and one hundred thousand talents of iron." Since David's reign is believed to be between c. 1048 and c. 1007 BC according to Old Testament chronology, the use of the daric is either an anachronism or a conversion by the writer into contemporary units. The other instance is Ezra 8:27; also a derivative Greek term "darkemonium" is recorded in Ezra 2:69 and three times in Nehemiah 7:70-72.

In the ancient times, it was nicknamed "the archer". For instance, the Spartan king Agesilaus II remarked that he had been driven out of Asia by "ten thousand archers", referring to the bribes distributed by the Persian King.

## DARIC GROUP STRUCTURE & TIME LINE

# GOSTARESH FOULAD TABRIZ

| Investment Holding Company |

| PUBLIC JOINT STOCK |

This investment company is operating as the largest holding company of the DARIC group consisting of several complexes, plants and projects. The management approach taken by this company was an element that provided for the expansion of scope of activity of this group under multidimensional strategic plans.

This company is a center of diversified activities with a broad organizational system and the products of its industrial plants consist of various kinds of Copper & Gold Ore, Iron ore (Hematite & magnetite), Iron and titanium dioxide concentrates, Limestone (purity of over 97%), Silica Stone (purity of over 97%), Coal, Steel Billet & Bloom, Plain rounds & Rebar, Galvanized Coil & Sheet, Galvanized Steel Pipe & Tube, Structural Steel (I-beams, H-beam, angles, channel), Steel Structures and Traveling Overhead Cranes.

In recent years, the company policies and procedures are based on constructing and transferring the plant's share as the cash or finance.

This process causes increases of the industrial development pace along with high employment rate in the region and also able to create a best atmosphere for producers in the form of specialty and for the public in the form of cooperation or investment.

## DORPAD Tabriz Industrial Group

Private Joint Stock Company

Dorpad Tabriz Industrial Group were established on a plot of land measuring 40 ha in 2001 with the purpose of production of various kinds of plain rounds & rebar, galvanized coil & sheet, galvanized steel pipe & tube (utilized in supplying water and gas) and Square and rectangular profiles. The annual production capacity of the plants was designed to be 700,000 tons.

As a result of performed endeavor by Dorpad management and it's careful planning system, this company achieves preparing the foresaid productions in several sizes with an annual capacity of 1,200,000 tons.

This company has a continuous control system and it has obtained ISO 9001-2000 and OHSAS 18001 from TÜVNORD Company in addition to national standard certificates.

### Major Products of the Company are:

- Plain round & Rebar within a size range of 8 to 32 mm, with annual production capacity of 500,000 tons.
- Galvanized coil & sheet within a thickness range of 0.5 – 5 mm to a maximum width of 1250 mm under continuous hot deep galvanization process with a production capacity of 60,000 tons per year.
- Square and rectangular profiles within a size range of 10 to 60 mm and yearly production capacity of 50,000 tons in five production lines.
- Industrial Straight seam welded pipes within a size range of 1/4 to 4 inches with an annual capacity of 300,000 tons in six production lines.
- Galvanized pipes within a size range of 1/2 to 4 inches with an annual production capacity of 100,000 tons.
- Water and gas pipes within a size range of 1/2 to 4 inches with an annual production capacity of 100,000 tons.
- Scarfed seam & stretched pipes taking use of the modern SRW technology within a size range of 1/2 to 2 inches with an annual capacity of 100,000 tons. This production line with “the hot stretch system”, “removing the pipe's joint tag”, “hydrostatic testing up to 200 bar” and “fully automatic packing system” is one of the exclusive production lines in the whole country.

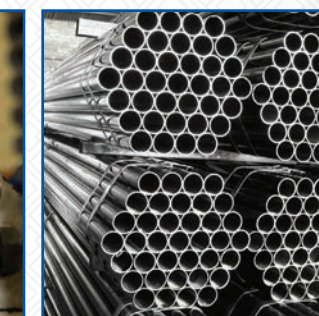

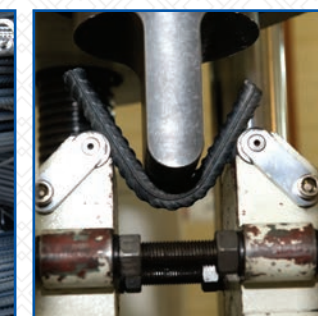

### Under Construction Development Projects

Development projects considered by this industrial group have currently a focus on the production of open and closed profiles, guard rails, channel, beams, angles and API pipes.

Also, in order to provide required Steel Billets for hot rolling mill plant, below projects are under construction:

- Direct Reduction Plant with the capacity of 200,000 tons per year
- Steel Making Plant ( EAF & CCM ) with the capacity of 300,000 tons per year

Address: 6 km distance of islamic island road, Tabriz, East Azarbaijan Province, Iran.

## DORSHAHIN Tabriz Trading Group

Private Joint Stock Company

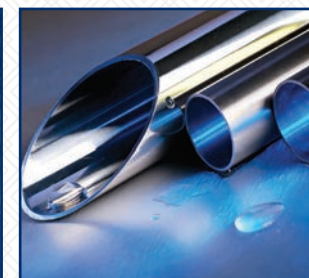

This group as one of the holding subsidiaries was established for the purpose of making sales process more accessible and fast, the demand & order management and to service satisfactorily to the customers of Investment Company of Gostareh foulad Tabriz in 1383. For now this company is one the biggest trading company in marketing and goods sales.

### The products have been selling by this company are:

- Dorpad Tabriz industrial group manufacturing products: Plain round & Rebar, Galvanized coil & sheet, square and rectangular profiles, Industrial Straight seam welded pipes, Galvanized pipes, Water and gas pipes, Scarfed seam & stretched pipes.
- YAGHUT Trailer Manufacturing Company products: curtainsider sliding & immobile roof, flatbed, tanker, container, Refrigerated, Tipper semi-trailer
- Yagout San'at Tabriz products:  
Erection & installation of steel structures and traveling overhead cranes, H-Beam assembling

Considering the extent and variety of products and in order to supplying the customer needs, this company has created the internal representation company network and the sales offices in some cities and province centers.

Address: 6 km distance of islamic island road,Tabriz, East Azarbaijan Province, Iran.

## YAGOUT SAN'AT Tabriz

Private Joint Stock Company

Yagout san'at started its activity on a plot of land with area of 10 ha in 2005 in the field of design, manufacturing, erection & installation of heavy steel structures and traveling overhead cranes.

Utilization of "Modern equipment and machineries", "The experts manpower", "Significant endeavors of managers" and Observing "the international updated standards" are the factors help to this company to prove its authority in operating the major industrial and construction projects as short a time period as possible with a desirable quality.

The group after years of professional experience in the major of industrial and construction projects reaches its nominal capacity to 35,000 tons per annum.

It is worth mentioning that from the starting the operating up to now, Yagout san'at designs, and fabricate more than 200 thousand tons light & heavy steel structures and manufactures hundreds overhead traveling cranes in various capacities.

### Products and Services:

- Design, manufacturing, erection & installation of steel structures (such as melt shop, casting, rolling mills and scrap yard saloon, industrial stairs, walkways, ladders and platforms, steel chimney, stack and towers).
- Design, manufacturing, erection & installation of traveling overhead cranes in various capacities.

- Design and manufacturing various kinds of steel storage tanks .
- H-Beam assembling, welding and straightening up to 800mm-wide flange sizes and 1800mm-wide web sizes by full automatic machines.
- Fully automatic shot blasting and manual painting of steel structures.
- Constructing and Installation of steel Bridges & Decks.

Address: 6 km distance of islamic island road, Tabriz, East Azarbaijan Province, Iran.

## BONAB Steel Complex

BONAB steel complex has started its activity in several phases on a plot of land at industrial zone of Bonab city and with an area of 130 HA since 2005.

This complex consists of several major plants including Steel making and hot rolling mill plant as the following table. The main product types of this complex are Steel billet, Plain round, Rebar, I-Beam, Equal leg angle and steel channel.

Plant Capacity & Production Data

Sıra	Üretim hattı		Ürünler	Üretim kapasitesi: yıl/ton
1	Foolad Shahin Bonab	Hot rolling mill Plant 3 Production Line	Plain Rounds & Rebar	1,500,000
		Steel making Plant EAF & CCM	Steel Billet	500,000
2	Foolad Sanat Bonab	Hot rolling mill Plant 2 Production Line	Plain Rounds & Rebar I Beam, Equal Leg Angle, Steel Channel	1,000,000
3	Foolad Sanat Shahryar	Steel making Plant Induction Furnace & Continuous Casting	Steel Billet	500,000
4	Foolad Sanat Sahand	Hot rolling mill Plant 2 Production Line	Plain Rounds & Rebar	1,000,000
5	Gostareh foolad sharyar (Under construction project)	Direct reduction plant Midrex process	Sponge Iron	1,500,000
		Steel Making Plant EAF & CCM	Steel Billet	1,500,000
		Heavy steel section Rolling mill plant 2 production line	IPB , Equal leg angle and steel channel	1,000,000

THIS COMPANY HAS BEEN SOLD IN 2012

## FOULAD SHAHIN Bonab

Private Joint Stock Company

FOULAD SHAHIN Bonab Company was established on plot of land with an area of 29 HA. This company is included of:

(a) Hot rolling mill plant in three (3) separate production Lines with an annual production capacity of 1,500,000 tons of various kinds of plain round & rebar.

(b) Steel making plant (EAF & CCM) with an annual production capacity of 500,000 tons of steel billet.

In 2010, February the company has succeeded to obtain ISO 9001-2008 standard of Norway DNV Company and all the company's products are licensed by "Institute of Standard and Industrial Research of Iran (ISIRI)".

THIS COMPANY HAS BEEN SOLD IN 2012

## FOULAD SANAT Bonab

Private Joint Stock Company

FOULAD SAN'AT Bonab Company was established on a plot of land with an area of 11 HA and has been operated in 2008. This company is included of: (a) Hot rolling mill production line with 500'000 tons annual capacity, product various kinds of plain round & rebar. (b) Hot rolling mill line with 500,000 tons annual capacity, product various types of steel sections in the forms of I-Beam, Equal leg angle and steel channel. In 2009, the company has succeeded to obtain ISO 9001-2008 standard of Norway DNV Company and all the company's products are licensed by "Institute of Standard and Industrial Research of Iran (ISIRI)".

THIS COMPANY HAS BEEN SOLD IN 2012

## FOULAD SANAT SHAHRYAR

Private Joint Stock Company

The Executive operations of Foulad Sanat Shahryar Company were started on a plot of land with an area of 9 HA in 2008 and the company has been operated in July, 2010. The annual production capacity of this plant is 500,000 tons of steel billet. This company contains following units:

- Scrap processing unit
- Second Steel construction consist of one LF furnace
- Three (3) strands continuous casting machine
- Fume dedusting plant
- Laboratory and quality control unit

THIS COMPANY HAS BEEN SOLD IN 2012

## FOULAD SANAT SAHAND

Private Joint Stock Company

FOULAD SANAT SAHAND company was established on a plot of land with an area of 11 HA and has operated in 2010.

The company contains two hot rolling mill production lines with 1,000,000 tons annual capacity, product various kinds of plain round and rebar.

The company's products are licensed by "Institute of Standard and Industrial Research of Iran (ISIRI)".

THIS COMPANY HAS BEEN SOLD IN 2012

Please use the adjacent QR code to reach detailed information about Gostareh Foulad Shahryar

## GOSTARESH FOULAD SHAHRYAR

Private Joint Stock Company

The executive operations of this plant have been started on a plot of land with an area of 70 HA includes the Direct reduction, Steel making and Hot rolling mill plant as following list:

- Midrex Direct Reduction plant with an annual production capacity of 1,500,000 tons of sponge iron.
- Steel making plant (EAF & CCM) with an annual production capacity of 1,500,000 tons of steel billet.
- Heavy & Semi-heavy hot rolling mill plant (IPB, Equal leg angle and steel channel) in two (2) production lines with an annual production capacity of 1,000,000 tons.
- Air separation plant for producing 9000 Nm<sup>3</sup>/h gaseous oxygen.

THIS COMPANY HAS BEEN SOLD IN 2012

## SAHAND-E-GHARB Steel

Private Joint Stock Company

This company is located at distance of 6 km from Bonab Steel Complex in Ajabshir industrial zone. The company construction was started on plot of land with an area of 30 ha in 2009 and operated in July, 2011. Currently the factory is producing 500,000 tons of steel Billet per annum.

**This company contains following units:**

- Scrap processing unit.
- Steelmaking unit consists of 6 sets (double crucible) of induction furnaces and a ladle furnace (LF).
- Continuous casting unit.
- Fume dedusting plant
- Laboratory and quality control unit

THIS COMPANY HAS BEEN SOLD IN 2012

## SAEB Steel Complex

Private Joint Stock Company

This complex is constructing on a plot of land with an area of 50 ha in Ajabshir industrial zone in East Azarbaijan state with ideal infrastructures and utilities.

Under construction plants of this complex are included of :

- Coal Based Direct Reduction plant with annual capacity of 400,000 tons,
- Steel Making plant with annual capacity of 550,000 tons.
- Heavy Section Mills with annual capacity of 300,000 tons.
- Wire Rod & Bar Mills with annual capacity of 250,000 tons
- Air Separation Plant for the production of 4000 Nm<sup>3</sup>/h gaseous oxygen.

**THIS PLANT IS UNDER CONSTRUCTION**

### Plant Capacity & Production Data:

No.	Plant	Product	Size	Annual Capacity tones per year
1	Coal Based Direct Reduction	Sponge Iron	-	400,000
2	Steel Making	Billet & Bloom	150 x 150 - 240 x 240	550,000
	EAF & Continues Casting		230 x 260 mm	
3	15 Stand Profile Mill	H Beam (IPB)	100 mm to 160 mm	300,000
		I Beam (IPE)	120 mm to 270 mm	
		I Beam (NPI)	140 mm to 260 mm	
		Equal Leg Angle	100 mm to 150 mm	
		Steel Channel (UE)	120 mm to 240 mm	
		Steel Channel (NPU)	140 mm to 260 mm	
4	13 Stand Rebar Mill	Plain Rounds	8 mm to 32 mm	150,000
		Rebar		
		Plain Rounds in Coil	5.5 mm & 6 mm	100,000

## YAGHUT Trailer Manufacturing

Private Joint Stock Company

YAGHUT Trailer Manufacturing company was established on a 40 hectare land contains 40'000 square meters indoor area for the purpose of design and manufacturing various kinds of 3-Axle semi-trailers & It formally started operating since 2013.

This company base on owning the “valid certifications” and also “utilization of modern equipment and machineries” according to the standards of Europe is capable to manufacture 25 products per day with high quality as below list:

- 3-Axle Curtainsider sliding roof semi-trailer with lift master.
- 3-Axle Flatbed semi-trailer 13.60 & 12.60 meters (with twist lock).
- 3-Axle Tanker semi-trailer.
- 3-Axle Container semi-trailer .
- 3-Axle Refrigerated semi-trailer .
- 3-Axle Tipper semi-trailer.

All the company's products are confirmed by Iranian national standards organization, Iran's environmental protection organization and traffic police (NAJA).

## TAVANGARAN SAHAND Industrial Group

Private Joint Stock Company

Tavangaran Sahand began its activities in mining scope with aim of supplying Iron Ore raw material for steel making plants, since 2010.

The main activities: Exploration, Extraction, crushing and grading, Beneficiation (especially Iron Ore, Titanium, Gold and Copper) and construct ore Processing & Concentrate plant for cited mines.

Engineering services include: Exploration, Remote Sensing, Geophysics and Geochemistry studies, Design, Exploitation, Processing, Trading and supplying of raw materials in metal mining projects are on the agenda in this company.

### RUNNING PROJECT (PROCESSING PLANTS):

- 1) Skandian mine 52% Titanium Concentrate plant.
- 2) Skandian mine 64% Magnetite Concentrate Plant.
- 3) Moil Mine 65% Hematite Concentrate plant.
- 4) Buket Mine Baked Lime Manufacturing Plant.
- 5) Bashmaq mine 30% Copper Concentrate Production line.

### OWNED MINES:

#### Non metallic Mines:

- Soleiman Abad silica Mine
- Buket limestone mine
- Amir coal mine limestone Mine
- Toreh travertine mine
- Tarse Bolaq silica mine
- Mirbashi Hesar coal mine
- Quzlu coal mine
- Qoydaraq coal mine
- Bardeh Zard silica mine
- Gedalu fire clay mine
- Tazeh Shahr basalt mine
- Bohlul Dagi quarry mine
- Leili Dagi coal mine
- Khalifeh Kandi lime stone mine
- Khatab coal mine
- Qareh Kand barite mine
- Baba Ali marble mine

#### Metal Mines:

- Moil mine (hematite iron ore)
- Ahmad Abad mine (iron ore)
- Dash Aqol mine (iron ore)
- Astamal mine (iron)
- Avan mine ( iron –copper)

#### Poly Metal Mine:

- Skandian titanium mine
- Bashmaq copper mine
- Aqcheh Kohel polymetal mine (with the preference of gold)
- KoorMolla polymetal mine (with the preference of gold)
- Tikmeh Dash polymetal mine
- Granite Hashtroud copper mine

## SAHAND AZARAN Copper Industry

Private Joint Stock Company

“Sahand Azaran Copper Industries Co.” has been established as a subsidiary of “Daric Group” with the aim of investment in “Bashmaq Copper Mine”. This mine is located in nine kilometers of north-east of Hashtud county and 123 kilometers of south-east of Tabriz city, east Azerbaijan province, Iran and average elevation of mine is about 1900 meters above sea level. Exploration works has been started in 2012 and vein type ore has been proved. The main mineralization of this ore includes copper minerals and beside this valuable metal, there exists gold in this ore. Its reserve has been estimated more than two million tons sulfur minerals with average copper grade of 0.7 percent. For the time being, a project for construction of a plant is in progress adjacent mine in order to produce copper concentrate with grade of 25-30 % on a 30 hectares area. Capacity of this plant is 1100 tons per day raw material.

## Iron and Titanium processing industry company

Private Joint Stock Company

“Iron & Titanium Mineral Processing Industrial Co.” has been established as a subsidiary of “Daric Group” with the aim of investment on “Eskandian Titanium Mine”. This mine is located in Urmia city, west Azerbaijan province, Iran and its elevation is about 2,200 above sea level. Exploration activity was begun in 2011 and exploitation certificate was taken in 2012. Ilmenite and Magnetite are the main ores of this mine and Vanadium is another metal which exist in the ore body. Reserve of this mine estimated more than 5 million tons of Titan and Iron ore with average grade of titanium from 6 to 12 percent and as for iron, from 12 to 45 percent. For the time being, titanium and iron concentration plant with the grade of 44 and 66 percent, respectively is in construction stage on the ground with 3 hectares area and input capacity of this production line is 250 tons per day raw material.

## TAVAN GOSTAR AZAR SAHAND Tabriz

Private Joint Stock Company

This company is founded as a subsidiary of GFT Investment Company.

The main purposes of this company are electric power supply for plants and under construction projects in parent company that include following steps:

- Engineering, procurement and implementation of MV & HV substation in 400, 230, 132 KV
- Engineering, procurement and implementation of MV & HV power transmission lines
- Engineering, procurement and implementation of LV power distribution systems in production lines.
- Engineering, procurement and construction of MV & LV electrical panels
- Engineering, procurement and construction of MV & HV power transmission towers
- Design and implementation of Supply and equipment Details rolling lines include: furnaces , reduction gearbox, gearbox stand apart, pinions , Guillotine , packed floats battle paragraph and table etc.
- Design and Manufacture and supply of equipment Components, smelting lines CCM system , melting kettles , press and press crushing crush and etc.

Furthermore these main purposes that mentioned above, in near future this company intend that develop its activities according to another requests of steel project that determined in GFT group such as blow items:

- Engineering, procurement and construction of electrical power plants
- Commissioning and operation of power supply and distribution networks
- Engineering, procurement and construction of piping activities in water treatments, natural gas lines, compressed air lines, oxygen, nitrogen & argon lines, fuel oil lines, steam lines, lubrication lines and hydraulic lines

## SABALAN Iron & Steel Complex

Private Joint Stock Company

- “SABALAN Iron & steel complex” is being constructed on a plot land with an area of 70 ha And located at 15 km – distance from Meshginshahr to Ardabil road.
- This plant is one of the largest industrial-Mining projects in the North West of Iran so that the entire parts of steel making process (from iron ore mining to providing steel products) will be realized by constructing the foresaid complex.
- Under construction plants of this complex are included of :
- Iron Ore Beneficiation plant with annual capacity of 1,000,000 tons.
  - Coal Based Direct Reduction plant with annual capacity of 400,000 tons.
  - Steel Making plant with annual capacity of 500,000 tons.
  - Bar & Medium Section Mills with annual capacity of 500,000 tons.
  - Air Separation Plant for the production of 4000 Nm<sup>3</sup>/h gaseous oxygen.

The mentioned plants of this complex are described as below table:

No.	Plant	Product	Annual Capacity / tons per year
1	Beneficiation Plant	Iron ore concentrate	1,000,000
2	Direct Reduction Plant	Sponge Iron	400,000
3	Steel Making Plant EAF & CCM	Steel Billet	500,000
4	Hot Rolling Mill Plant	Bar & Medium Sections	500,000

## BONYAN DIESEL

Public Joint Stock Company

BONYAN DIESEL was established in 1969 under the license of DORMAN company(England) with the aim of assembly of diesel engines and then in 1976 Volvo diesel engine assembly were added to its product. In the years 1996-1999 The Transferring of DORMAN DIESEL company , the production stop and the country market conditions were the main reasons to be stopped all the production lines of this company and in the other hand caused that DORMAN DIESEL got out of the production cycle. Then Bonyan Diesel has kepted on producing diesel engines in limited form and changes its main approach to producing Diesel Gensets & required parts in automotive industries such as cylinder blocks ,axles , ...

In 2007, the company's shares through the stock exchange has sold and Daric investment company has bought the major part of its shares. A careful planning based on environmental conditions of the country and similar international models has done for the renovation and development of the company's structure in different aspects since that year. During the same years the legal limitations resulting from the factory location in the urban tissue such as bio-environment limitations and the civil rules and urban factors is one of the factors in limiting for continuing activities and the development in Bonyan Diesel Company.

Finally, the shareholders in the company has decided to move the production part to the new place in one of the industrial zones of Tabriz with a different approach and based on new technology of the world for the aim of achievement in agents of economic and industry by considering on the effective factors in the developing countries.

ATA Center will be designed and built with the purpose of creating the perfect environment for business, comfortable atmosphere for official part, charming, beautiful & modern place to order and spend free time with utilization of the new technology and based on local knowledge. All equipment and raw materials are intended according to the latest technology of the world that causes ATA Center will be more special compared with other existing centers.

### LOCATION:

ATA Center as the largest residential, sport, cultural, service, recreational, commercial, and administrative center is being constructed at the West part of the Tabriz Megalopolis (Northwest of the country).

Easy access to the western & southern highway and the short distance of the project with Shahid Madani International Airport, Railway Station and Qaramalek Metro station all cause that this modern complex would be in a special and developing situation.

### FACILITIES:

#### Commercial and administrative facilities:

- Numerous commercial units with various sizes
- Independent administrative building with more than 120 unit
- The largest Hypermarket in North West of the country with more than 17 thousand square meters building area.
- Four specific marketplaces (clothing, appliance warehouse, traditional market and automotive for the first

time in the country) and 3 special commercial & shopping center for branded goods.

#### Service facilities:

- Specific helicopter pad
- Roofed parking place with the capacity of more than 7000 car in 3 floors and numerous entrance.
- Outdoor parking place with the capacity of more than 3000 car
- The specific public transportation station near by metro

stations.

- The car service complex (gasoline and gas pumps, Carwash, Car technical examination center, etc.)
- Specific exit ways of Tabriz west highway road and Western industrial road

#### Recreational & cultural facilities:

- Ten HA Specific green space with the recreational and entertainment facilities
  - Movie complex with 4 separate salons
  - Specific Amphitheater with the capacity of more than 1,000 people
  - First and highest car racing resort
  - Roofed specific amusement parks with utilization of advanced technologies in world.
  - Various entertainment salons.
  - Numerous halls
  - Special and unique roof garden
- Sports & Health:**
- Soccer-specific stadium with the capacity of 10000 people
  - bowling and snooker salons. Welfare facilities:

- Different and various restaurants

- Specific food court

Residential facilities:

- Five-star hotel with 260 rooms, luxury suites & exclusive design along with the high-tech facilities & the view of soccer-specific stadium.

#### ADVANTAGES:

- Reduce interurban trips
- Parking place with the largest capacity in the Northwest of the country
- Decorating according to various spaces.
- A suitable place for holding conferences and national & international seminars
- Easy access to the downtown and neighbor provinces
- Protection and security systems and smart CCTV cameras
- Green space and charming landscaping
- Recreational, welfare, sport and numerous entertainment facilities.
- Utilization high quality equipment & materials in accordance with international standards.

## Coolack-e-Shargh

[PRIVATE JOINT STOCK COMPANY]

Coolack-e-Shargh Co. has been inaugurated in 1991 and its main goals were to produce various kinds of Sodas, different sized PET bottles and edible CO<sub>2</sub> gas. This company had 2 productions lines those days and was located on a beautiful area of Sahand's hillside at 23km from Tabriz city. Because of using pure waters emanating from Sahand's hillside and application of world's best essences and desirable raw materials, Coolack-e-shargh was being capable of producing standard and high quality sodas and draws Iranian's attention and make them much more vital and cheerful.

After transferring this company's shares to Azerbaijan's development investment corporation and with its effective management, more activities were done in order to increase production lines' capacity and the variety of products, so that another 3 production lines were added and also mineral water and Dough were entered to the products basket. It's planned to produce more new products in the future.

Trying to promote work force's technical knowledge and expanding the activities of R&D unit, Coolack-e-shargh company's top managers enhanced suitable investment and the number of official certifications and work permits obtained from The ministry of Health were increased to 23, in 6 tastes and 7 sizes. Also it could win international awards in France and Switzerland in the field of product's quality and added them to the previous ones.

Utilizing Full-Automatic machines, experienced and skillful work force and high quality raw material and also using pure waters emanating from Sahand's hillside, This company would be able to attract lots of customers from different countries, in such a way that more than 50 per-cent of production capacity is being exported to Iraq and Persian Gulf countries, Canada and USA. This company was chosen as the number one exporter in 2009-2010.
